

Type 6.2 Specification Sheet

Modular crane BMU on a vertical track system along a roof parapet

The Manntech™ Type 6.2 track-based modular building maintenance unit (BMU) is suitable where track construction is anchored to the load bearing parapet.

The range is suitable for installation on buildings where roofs are non-load bearing and where there is insufficient space on the roof, as well as buildings with very high parapets.

Key Features

- Advanced functionality to suit a wide range of building requirements
- Customisable mast and jib
- Digital system with automatic movements and remote monitoring for data insights
- Recommended for high complexity building structures
